

Roll No. : FBD-11-2-23

Objective

Intermediate Part First

Paper Code.

**BIOLOGY (Objective) GROUP - II**

**6466**

Time: 20 Minutes

Marks: 17

Q.No.1

You have four choices for each objective type question as A, B, C and D. The choice which you think is correct, fill the relevant circle in front of that question number on computerized answer sheet. Use marker or pen to fill the circles. Cutting or filling two or more circles will result in zero marks in that question. Attempt as many questions as given in objective type question paper and leave other circles blank.

S.#	Questions	A	B	C	D
1	The oyster mushroom is considered as:	Parasitic fungi	Saprotrophic fungi	Carnivorous fungi	Omnivorous fungi
2	The type of algae takes part in coral reef formation is:	Brown	Green	Golden	Red
3	Which type of respiration is found in bacterium E.Coli?:	Aerobic	Anaerobic	Micro aerophilic	Facultative anaerobic
4	The mysterious brain infection is caused by:	Virion	Prion	Bacteria	Fungi
5	The protein present in microtubules is:	Actin	Myosin	Tubulin	Tropomyosin
6	The vitamins are essential raw material for the synthesis of:	Activator	Co-factor	Co-enzyme	Prosthetic group
7	Monosaccharides which rare in nature and occur in some bacteria are:	Troises	Tetroses	Pentoses	Hexoses
8	The stomach can digest the:	Proteins	Fats	Starch	Cellulose
9	Which is agranulocyte?	Basophilis	Eosinophilis	Monocyte	Neutrophilis
10	The volume of blood in a body weight of 72 kg is:	5 litres	6 litres	7 litres	8 litres
11	About 70% of CO <sub>2</sub> is carried as:	Carbonates	Bicarbonate	Carbonic acid	Acetic acid
12	Pepsinogen is secreted by:	Mucous cells	Parietal cells	Zymogen cells	Oxyntic cells
13	The first action spectrum was obtained by:	Van Neil	Engelmann	Melvin Calvin	Van Mohl
14	Chlorophyll-b is found along with chlorophyll-a in:	Bacteria	Cyanobacteria	Bryophytes	Embryophytes
15	The length of giant squid in meters is equal to:	5	10	15	20
16	The exclusively marine phylum is:	Protozoa	Porifera	Coelenterata	Echino dermata
17	The scientific name of egg plant is:	Capsicum annum	Solanum tuberosum	Solanum melangena	Solanum nigreem

**BIOLOGY (Subjective) GROUP - II**

FBD-11-2-23

Time: 02:40 Hours

Marks: 68

**SECTION - I****2. Write short answers to any EIGHT parts.**

16

- (i) Differentiate between amylose and amylopectin.
- (ii) Do you think that koshland change the idea of enzyme action?
- (iii) Write any two properties of enzymes.
- (iv) How heat influence the rate of enzyme action?
- (v) What are two main ecological importances of Lichen's?
- (vi) Differentiate parasitic fungi from saprophytic fungi.
- (vii) Differentiate protostomes from deuterostomes.
- (viii) Why arthropods have reached the peak of invertebrate evolution?
- (ix) How swim bladder help the fish to survive in aquatic environment?
- (x) Write any four characters of birds.
- (xi) Define compensation point.
- (xii) How is daily rhythmic activity of stomata governed?

**3. Write short answers to any EIGHT parts.**

16

- (i) Name and define the method used to protect walnut tree from pest.
- (ii) The environmental pollution is a national problem in Pakistan. Why?
- (iii) Cell membrane offers a barrier between cell content and environment. Justify it.
- (iv) Golgi complex is concerned with cell secretions. Why?
- (v) Why fungus like protists are not fungi?
- (vi) Water mold played infamous role in human history. Justify it.
- (vii) Write two uses of chlorella.
- (viii) What are red tides?
- (ix) Define protonema.
- (x) What is the role of meristematic tissue in hornworts?
- (xi) Differentiate between source and sink.
- (xii) The heart of fish is single circuit. Why?

**4. Write short answers to any SIX parts.**

12

- (i) What are the symptoms of AIDS?
- (ii) Differentiate between prions and virions.
- (iii) What is hunger pang? Also write its causes.
- (iv) How gastric juice production is regulated?
- (v) Differentiate between oxyntic cells and zymogen cells.
- (vi) What is diving reflex and how it is activated?
- (vii) Suggest the various characteristics of respiratory surface.
- (viii) What is respiratory distress syndrome?
- (ix) How does respiration take place in Earthworm?

**SECTION - II**

Attempt any THREE questions. Each question carries 08 marks.

**5. (a) Discuss biological method.**

04

**(b) Give comparison between closed and open circulatory system.**

04

**6. (a) What are polysaccharides? Discuss in detail.**

04

**(b) Give economic losses due to fungi.**

04

**7. (a) Discuss the structure of bacterial cell wall. Also give comparison between Gram positive and negative bacteria.**

04

**(b) Discuss the life cycle of Moss.**

04

**8. (a) Explain five kingdom system of classification in detail. Discuss its modification as well.**

04

**(b) Discuss various photosynthetic pigments in detail.**

04

**9. (a) What role plays cytoskeleton in the cell?**

04

**(b) Discuss parasitic nutrition and its various types.**
